

Payroll Software & Services

WHAT YOU NEED TO KNOW:

The backbone of HRO, payroll outsourcing (processing, withholding, and benefits accrual) is the most commonly outsourced HR function. In fact, according to research firm Gartner, the payroll business process outsourcing service market has an estimated five-year compound annual growth rate of 3.3 percent through 2015. NelsonHall reports top payroll drivers include reduction and control of costs; compliance and risk management; better technology; improved quality; and process improvement. Plus the need for a streamlined global and multicountry payroll process will continue to push the market forward.
